E-STOP - EMERGENCY STOP SWITCHES

Moujen supplies a broad product offering of Emergency Stop Switches or “E-Stops” as they are sometimes called. These switches are very common on almost all industrial process machines . Our switches are rated IP65 and carry agency approvals UL, CSA, CCC. From a manufacturing point, they are very easy to install – simply tighten the back mounting nut, snap on the contact block, and you are ready to go! We carry lighted and non-lighted versions in various sizes. Additionally, we supply “twist to release,” “pull to release,” and “locking key to release” features. They are also available pre-mounted in conduit boxes (yellow/black or ivory/black color combinations) for quick “on site” installations.

For samples, technical data, or pricing information, please contact our customer service desk!
