

~ *MOUJEN MONTHLY* ~

The ME Series Limit Switch is a smaller, more compact version of our rugged industrial Series MJ limit switch. It has many application uses where small size, low weight, and reliable switching is needed. It is a very popular limit switch used in high service life applications (10,000,000 operations minimum) such as CNC machines, plastics and wood-working equipment.

The ME contact block is a replaceable unit in the event that a current overload results in damaged or welded contacts – simply remove the units cover and the damaged block, and insert a new block without having to remove the switch unit from it's mounting.

There is a wide choice of field adjustable heads and actuators, captive cover screws, as well as IP65 oil-tight and water resistant ratings. Check our catalog or web site for further technical information.

For more information on our complete line of switch products, visit our web site at www.moujenswitch.com or contact Moujen Switch USA 16120 Caputo Dr. Morgan Hill, CA 95037 TEL: 800-532-5526 FAX: 408-778-0654 Send e-mail inquiries to info@moujenswitch.com.
