

~ MOUJEN MONTHLY ~

A product group that goes highly unnoticed, but offers extremely important benefits to the automation world, are our “*MFS Series Foot Switches*”. These small rugged switches, sometimes referred to as pedal switches, are used to control a variety of industrial applications. Typical applications may be the control of conveyor belts, adhesive machines, dentistry tools, coil winding equipment, machine tools, riveting presses, etc. The application potential is virtually limitless!

MFS SERIES

Moujen Switch offers several distinct options. There are two standard sizes, the miniature (80mm square) version which has a rugged plastic housing, and the more industrial version (70 X 170 mm) which is provided with an aluminum cast housing. Both styles of foot switch are rated minimum 10A 250VAC, SPDT contacts. There is also available a 15A 250VAC DPDT version in the industrial product line. All foot switches can be supplied with either normally “open” contacts, or normally “closed” contacts. All standard units are supplied with either a 1 or 2 meter cable. Visit our web site for more information www.moujenswitch.com !
