MN SERIES MICRO SWITCH

The MN Series switches hold a unique position in our broad switch line-up. Part of the “micro switch” family of products, these switches are typically a bit larger than most micro style switches. They fit an application need where size is not so critical, but ruggedness and feature rich solutions are important. Consider these MN Series specifications:

- Side mount cable/wire entry
- Wide choice of actuator heads, lever & pushbutton
- Completely sealed structure
- Temperature range: -15C to +80C
- NO or NC Contacts (SPDT)
- Mechanical life: 10,000,000 operations minimum
- Degree of protection: IP65

When your application requires a quality switch with long life and a high degree of protection, try the MN Series switch from Moujen!

A special word of thanks to all customers, reps, and distributors who took the time to visit with us at last month's "EDS SHOW" ! We enjoyed seeing you!

For samples, technical data, or pricing information, please contact our customer service desk!
